Charlotte, NC Area Strongest Economy in America

The Charlotte, NC metropolitan area has the strongest local economy in the nation according to POLICOM Corporation's annual economic strength rankings. Hilton Head, SC is top among the "Micropolitan" areas which are smaller urban centers.

"Economic strength is the long-term tendency for an area to consistently grow in both size and quality," stated William H. Fruth, President of POLICOM. POLICOM, located in Palm City, FL, specializes in analyzing local and state economies.

POLICOM annually ranks the 363 Metropolitan Statistical Areas and 577 Micropolitan Statistical Areas in the United States so POLICOM can study the characteristics of strong and weak economies in the county. POLICOM measures 23 different economic factors over a twenty year period to determine its ranking. The formulas determine how an economy has behaved over an extended period of time.

Both Houston and Dallas, TX jumped into the top ten strongest areas as each was ranked in the 20's last year. Growth in the energy industry helped boost their rankings.

Over the last five years, the Bakersfield, CA metropolitan area has improved the most in POLICOM rankings, going from 290th in 2004 to 122nd in 2008. A boom in the petroleum industry has helped this area to improve.

"The top rated areas have had rapid, consistent growth in both size and quality for an extended period of time," stated Fruth. "The rankings do not reflect the latest 'hotspot' or boom town, but the areas which have the best economic foundation."

The Micropolitan areas are smaller economies and do not have city with a population greater than 50,000 people. According to Fruth, their economies fluctuate much more than the larger Metropolitan areas.

"Many of the top ranked Micropolitan areas are resort destinations and scored at the top as a result of the boom in the construction industry," Fruth stated. "These areas are likely to fall in the rankings in the future as a result of the slowdown in the construction industry."

The most improved Micropolitan area is Big Springs, WY. As a result of growth in the oil and gas industry, it has gone from 421st to 71st among the 577 Micropolitan areas.

For economic strength rankings for all areas along with POLICOM's methodology, go to www.policom.com.

Ten Strongest Metropolitan Areas		Ten Weakest Metropolitan Areas	
1	Charlotte-Gastonia-Concord, NC-SC	363	Danville, IL
